

### VMR WHITSUNDAY NOTICE TO JETSKI OWNERS

A major service provided by VMR Whitsunday is to tow vessels to a safe haven (usually their launching point, where possible). Jetskis are different to standard boats in that they have a water intake at the front and we have been advised that damage may be caused by towing for some makes and models.

VMR Whitsunday offers a towing service at up to 15 knots, conditions permitting.

We suggest that you check your operators manual or consult your dealer whether there is a recommended procedure to be completed before towing commences - for example, some models have a tap/valve which must be turned off. It will be your responsibility to take the recommended remedial action

VMR Whitsunday is not an expert in jetskis but can tow them - at your own risk.

**You are responsible for any damage that may be caused by towing.**

If you call for assistance, we are prepared to tow you, but our skippers have been instructed that the tow cannot commence before you sign our standard indemnity document.

We are consulting jetski organisations for possible solutions and if VMR Whitsunday suggests an approach to be taken or devices to be used for the tow, your agreement will signify your acceptance and full responsibility.
