

## VOLUNTEER MARINE RESCUE WHITSUNDAY

Module : Cabin Door  
Type: SOP  
Version: 1

### STANDARD OPERATING PROCEDURES (SOP) CABIN SLIDING DOOR

#### 1. Introduction

This SOP describes the procedure to prevent injury by the cabin door on VMR1. It is the responsibility of every crew member to follow this procedure.

#### 2. Reference

VMR Training – Risk Assessment 23 July 2017.

#### 3. Detailed Procedure

The cabin door is large and heavy and can cause injury if it is allowed to slam shut. To prevent injury to person or damage to vessel the sliding door must always be positively locked in the open position or the closed position.

#### 4. Summary

If we all follow these guidelines we will be less likely to have problems/injuries with the Sliding Door on VMR1.
