

VOLUNTEER MARINE RESCUE WHITSUNDA

Module : Secure Tender
Type: SOP
Version: 1

STANDARD OPERATING PROCEDURES (SOP) SECURING OF TENDER

1. Introduction

This SOP describes the procedures for the securing of tender on VMR1. It is the responsibility of every crew member to follow this procedure.

2. Reference

VMR Training – Risk Assessment .23 July 2017

3. Detailed Procedures

To prevent the Tender from damaged, or being lost at sea, ensure that the Tender is pulled forward to the Sampson Post. The snap shackle at the base of the Rope box must be fitted to the tender bow towing eye and the painter must be tied to the Sampson post.

If rough weather is expected then a ratchet/hold down strap can be fitted across the tender.

4 Summary

If we all follow these guidelines we will be less likely to have problems/injuries whilst carrying out activations.
